Re: RFP2019-20 – Telecommunications System

The following question(s) has been submitted for RFP2019-20:

1) The RFP requests integration with paging, 2-way audio doorbell, can you provide additional information to these requirements? How many paging systems are required to integrate with?

**RESPONSE:** There are currently 2 paging systems that would require integration. We would like to be able to easily add more in the future.

2) What type of connection is needed? IP/SIP? FXS or FXO? Paging port?

**RESPONSE:** The integration requires a loop start trunk port. We are open to an ATA with an FXO port or whatever other solution the proposing vendor recommends to achieve the integration.

3) Are these devices included in the user count?

**RESPONSE:** No. Only IP desktop handset devices are included in that count.

4) What type of doorbell is in use, how many are in place? Analog, IP? Are these devices included in the user count?

**RESPONSE:** Currently we have two analog doorbells that establish two way audio using a loop start style trunk, similar to the paging integration.

5) The RFP requests a companion application feature, do all users need this? If not how many users require this application?

**RESPONSE:** The majority of users would require this functionality.
6) Can you please provide a breakdown of handsets required per location?

RESPONSE:
Historical Courthouse – 30 N. Broad St. Winder, GA 30680 – 60 handsets
Courthouse/Detention – 652 Barrow Park Dr. Winder, GA 30680 – 128 handsets
Buildings & Grounds – 47 Lee St. Winder, GA 30680 – 3 handsets
