Residential Driveway Permit Application

Site Address: _____

Map & Parcel number: _____

Applicant Name: _____ Phone Number: _____

Mailing Address: _____ City/State/Zip: _____

Email: _____

The driveway will be constructed on the _____ (NSEW) side of the County road at a distance of _____ feet _____ (NSEW) of the centerline of _____ (street or road name at nearest intersection).

Please place the green location sign in a visible area where you would like the driveway located.

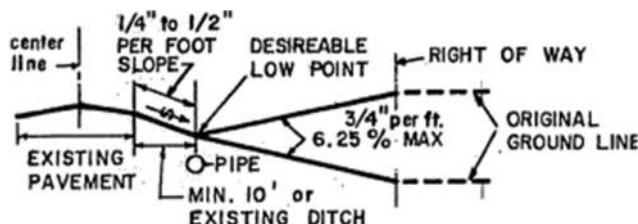

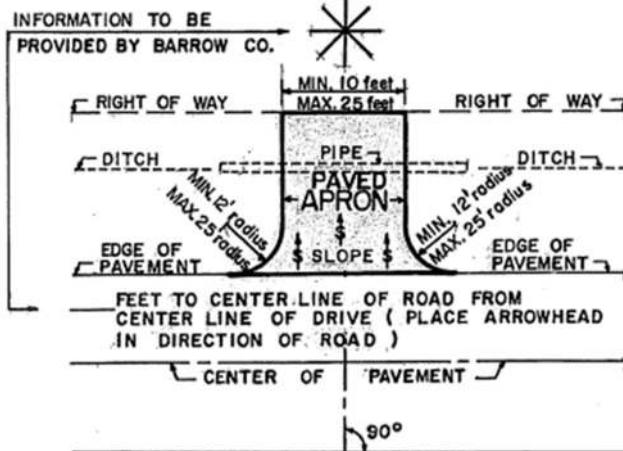

By signing this request I agree to construct or have constructed this driveway as described and illustrated by the attachments I have been provided. I also agree that I will be responsible for the maintenance of this driveway including the pipe, surface course and slopes.

To Be Completed by the County

PUT ARROWHEAD ON NORTH

Special Requirements

1. Extend pipe as necessary to obtain a 4:1 or flatter slope.
2. The pipe shall be GDOT standard 1030D. (and as specified in the Barrow County Development Regulations 20' minimum) _____ ft in width _____ inches in diameter. Minimum 1' of cover over pipe.
3. Existing surface flow to remain. Water cannot be diverted to Barrow County right-of-way.
4. No headwalls to be constructed on pipe.
5. No brick or other hazardous type mailbox allowed on right-of-way. (Mailbox shall be located on the exit side) All driveways should have a turnaround pad off right-of-way to prevent backing into the road.
6. All disturbed right-of-way to be regrassed to Barrow County specifications.
7. If driveway is used for construction entrance, it must be stabilized with 4' of stone as a minimum.
8. The green permit poster must be displayed at the proposed driveway location in plain view until work is inspected and accepted by Barrow County. **This poster is NOT an approved permit.**
9. Applicant to give Barrow County Driveway inspector a 24-hour notice before work begins and before each phase of construction.
10. Advance warning signs shall be required while working on Barrow County right-of-way.
11. Driveways on a dirt road shall have 4' of gravel placed on driveway from edge of road to end of road maintenance easement or right-of-way as a minimum.
12. Driveways on a paved road shall have a paved apron. Paved apron material shall consist of either a minimum of 6" of class A 3000p.s.i. concrete, or a minimum of 5" of compacted graded aggregate base and 3" of compacted superpave asphalt. All of the above will be placed on a suitable compacted sub-grade. Drive to be flush with existing edge of pavement. (see diagram to the left)
13. Permittee shall be responsible for any damage(s) to existing County road as a result of driveway construction.
14. The inlet and outlet end of all driveway culverts shall have a safety flared-end-sections that meet the standards of GDOT 1120 or 1125 or 1125.
